

# **GROUPRE USER MANUAL:**

## System Requirements:

- Python 3 or better.
- Microsoft Excel, LibreOffice Calculator, or some other program to develop and generate .csv files.

## Installation:

- The program does not require installation. It is simply run with user input.

## Registration:

- Not required.

## Data Field Requirements:

- All data fields will either be a string (in the case of the seat, name, and various preferences), or an integer (PID, and team number).

## Program Use:

- Simply verify that the file extension and path are correct, then run the program in command prompt.

## Troubleshooting:

- If any errors are received, verify the input is in the correct format.
- If the input is in the correct format and the user is still experiencing errors, please contact Groupe staff at (919) 360-1650.

FAQ will be available on the team website once there is user feedback and questions to answer.
