GROUPRE USER MANUAL:

System Requirements:

- Python 3 or better.
- Microsoft Excel, LibreOffice Calculator, or some other program to develop and generate .csv files.

Installation:

- The program does not require installation. It is simply run with user input.

Registration:

- Not required.

Data Field Requirements:

- All data fields will either be a string (in the case of the seat, name, and various preferences), or an integer (PID, and team number).

Program Use:

- Go to http://groupre-php-groupre.cloudapps.unc.edu, upload your .csv file, click run, and download the output.

Troubleshooting:

- If any errors are received, verify the input is in the correct format.
- If the input is in the correct format and the user is still experiencing errors, please contact Groupre staff at (919) 360-1650.

Current Needs, Should Project End Today:

- Finished GUI

- GUI/program interaction

- Debugging

- Finalization of web/cloudapps integration

FAQ will be available on the team website once there is user feedback and questions to answer.
